OPPORTUNITIES WITHOUT BORDERS

## ***Gralan Enterprises, Inc.***

Established – 2010

City of Houston Woman Owned Business Enterprise

Gralan Enterprises, Inc. is a company created against the common mold in the construction world. The driving force behind this woman-owned concrete construction company stems from its Founder, Owner & CEO, Grace Alvarado Landry, whose hands-on leadership is taking the company to new heights. The star-speckled background of their company webpage is an indication that the sky is not the limit for Gralan Enterprises, Inc.; they are reaching for the stars.

In 2010, Grace’s business acumen opened the door to an opportunity to start a qualified minority and woman-owned construction company that would work equally and competitively in what Grace reverently refers to as an “old boys’ club”. Succeeding in a male-dominated industry was a challenge accepted by Grace and her team of over 93 employees, a challenge that started Gralan Enterprises, Inc. on their first project providing the Place & Finish package for the VA Hospital in Houston. Throughout the years, they have been a part of numerous land mark projects in Texas & Louisiana and are currently working with Hensel Phelps | CBIC to provide their Horizontal Formwork and Place & Finish services to the new five-gate international terminal expansion project for Southwest Airlines at William P Hobby Airport in Houston, Texas. Being a part of this airport expansion project only seems fitting for a company looking to spread their own wings and take off into new heights.
